---

"I strongly urge that the Prop 65 NSRL (No Significant Risk Level) for glyphosate be set at ZERO to protect the citizens of California."

The World Health Organization determined that Glyphosate ( Roundup ) is a carcinogen that is toxic to people, pets, and our planet. You should not let Monsanto, Big Ag, and their lobbyists set the limits 1100 micrograms of exposure for their own profits. Do not allow Monsanto's greed for profit be the guide for the health of the people of California. Say no to their corporate sponsored "paid for" data, and say no to 1100 micrograms. Set the level to ZERO glyphosate to protect the citizens of California.

Thank you for putting the health of Californians and our planet over the profits of Monsanto and Big Ag.
